**Subject:** RE: Portland Harbor RI Question

No, that approach does not work for us. We are trying to get through this review and need answers as we proceed. If Integral is unavailable for questions, then we will just make the changes we require and direct the LWG to incorporate them.

Kristine,

Attached please find an email chain from March 2013 that documents our agreement to utilize the phrases “municipal” and “non-municipal” when referring to stormwater outfalls in the RI. Let me know if this answers your question as to why there was a change from “private” to “non-municipal” in Section 1 of the draft final RI.

In regards to the process for finalizing the RI, the LWG and Integral are prepared for the final RI hard-copy production upon final approval. In the meantime, unless you need RI-related information in connection with the FS, we believe it would be most efficient if you can provide all your informal questions at one time so Integral can focus their efforts to generate responses. Let me know if that approach works for you.

**Subject:** Portland Harbor RI Question

Jim and Gene – I have reviewed Section 1 and have a question. I noticed that you changed “private” to “non-municipal”. I was wondering why you made this change. Usually in stormwater, there is municipal and private...this is a new term. Is there something to the “non-municipal” that is unique in Portland Harbor that includes other than “private”?
